E-commerce Sales Analysis Dashboard

Source note: the uploaded dataset contains an ecommerce field named **profit_margin**. This report preserves that field as the dataset's profit metric rather than assuming it is a percentage.

Key Findings

- **Revenue:** Total recorded sales are █5,865,293.05, across 34,500 orders.
- **Customers:** The dataset contains 7,903 unique customers and 24,912 unique products.
- **Category:** Electronics has the highest recorded revenue at █3,319,206.50.
- **Peak revenue month:** December 2024 with █278,154.19.
- **Returns:** 5.52% of orders are marked as returned.
- **Delivery:** Average delivery time is 4.81 days.

Tableau Dashboard Structure

Sheet	Visualization
Revenue Trend	Line chart — Month vs Total Revenue
Profit Trend	Line chart — Month vs profit_margin metric
Customer Growth	Line chart — Month vs unique customers
Category Performance	Bar chart — Category vs Revenue
Regional Performance	Table — Region, Revenue, Return Rate, Delivery
KPI Summary	Text/KPI cards — Revenue, Orders, Customers, AOV, Return Rate, Delivery

Important dataset limitation

The uploaded files are ecommerce sales data, not the startup_financial_analysis.csv referenced in the requested workflow. They do not contain CAC, LTV, LTV_CAC_Ratio, or Run_Rate fields. Those startup KPIs therefore are not included or estimated in this report. Upload the correct startup-financial CSV to build the exact Startup Financial KPI Dashboard specified in the original steps.
